## TODAY'S BEST INVESTMENT FOR SMALL SAVERS

### NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum, free of income-tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; also at Treasuries at Bhuj (Kutch), Imphal (Manipur) and Coorg-Mercara (Coorg).

3½%

TEN-YEAR TREASURY SAVINGS DEPOSITS

For further information and/or rules governing these investments please write to the Provincial National Savings Officer of your State or the National Savings Commissioner, Gorton Castle, Simla-3.

\* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :—B.—Births; B.R.—Birth Rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory Diseases; M.D.—Maternal Deaths; D.R.—Death Rate; I.D.—Infantile Deaths (included in total deaths).

**REMARKS**

The figures of births and deaths shown in this statement for week ending the 7th November 1953, relate to 192 towns with an estimated population of 25,079 thousands. The total number of towns is 296 and their population is 36,160 thousands. Thus 65% of the total number of towns representing 69% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,352 and 7,656 representing birth and death rates of 27.7 and 15.8 per thousand of population respectively.

(A) States (Parts A & C) :—The data here relate to 169 towns with an estimated population of 22,090 thousands. Information about Bihar and West Bengal could not be included. The total number of towns is 250 and their population is 30,810 thousands. Thus 68% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,938 and 6,908 representing

birth and death rates of 28.1 and 16.3 per thousand of population respectively. The table at the end gives the position by States.

Palayamkottai in Madras was the only town which had a high death rate of 66.9 per thousand of population and this high death rate was mainly due to deaths from Cholera.

(B) States (Part B) :—The data here relate to 23 towns with an estimated population of 2,989 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 50% of total number of towns representing 56% of total population is covered. The numbers of births and deaths recorded in these towns were 1,414 and 748 representing birth and death rates of 24.6 and 13.0 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
